EXTENDED DAY PROGRAM

Extended Time For Expanding Minds

ENRICHMENT

HOMEWORK

SNACK

FITNESS

## MONDAYS Starts September 9th

### ARTS & CRAFTS

In Arts & Crafts Club, young Apollo students will learn many techniques to turn their ideas into reality under the guidance of our Apollo staff. Club members will use their creativity and imagination to make many objects for gifts and decorations.

### BOARD GAMES CLUB

Whether in games of chance or games of skill, board games are an incredible source of fun, social interaction, and mental activity. Students in this club will play many of their favorite board games, and even learn some new ones to teach their parents.

## TUESDAYS Starts September 3rd

### YOUNG EXPLORERS

Students will learn about mysterious rainforests, towering mountains, sweltering volcanoes, exotic cultures, and many other wonders this amazing planet has to offer along with fun travel tips and the great explorers whose daring gave us the maps and charts we take for granted today.

### MATH CLUB

Math is fun – we’re not just saying that, let us show you! Our math enrichment club uses a variety of games and hands-on activities to help improve our students understanding of this critically important subject. Our curriculum emphasizes how math relates to creativity and everyday life, whether it is the geometry of creating their personal starship or in saving money for a trip to the theme park.

DAILY APOLLO CLUBS

# MINER ELEMENTARY SCHOOL PRESENTS 2019-2020

## **WEDNESDAYS** Starts September 4th

### **SCIENCE CLUB**

Parachutes, spaceships, lasers, hadron colliders - we all know that science is a subject that's just for the cool kids (like you, of course!). The good news is that science is easy and incredibly fun to start practicing! Students in Apollo Science will learn how to ask the questions that are the beginning of all scientific discoveries, how to make hypotheses, and of course the fun part - testing them to see how they work. Through a hands-on and exciting curriculum, this club will help your child become more curious and have a deeper understanding about how the world works.

### **LEGO BUILDERS**

Everybody likes to build! Creating new objects has always been at the core of human existence, and is one of the most rewarding and fulfilling activities for the old as well as the young. In our club, your child will learn many basic building techniques and will be encouraged to put their imaginations and hands to work in making their ideas turn into reality.

## **THURSDAYS** Starts September 5th

### **CIVICS**

No one just grows up and becomes a participating citizen of our American constitutional republic. Just like any right, skill or responsibility, it takes a combination of education and practice to fully participate in our civic society. Students will learn about local, state, and federal government, how to investigate and form their own opinions on issues that matter to them, and participate in their own debates and class elections.

### **APOLLO CHEFS**

Preparing and cooking food is one of the most important and rewarding life skills a child can learn! Students will also gain experience with kitchen and equipment safety, safe food handling, and food presentation, while making a nice snack for themselves after school.

## **FRIDAYS** Starts September 6th

### **STORYTELLING CLUB**

While it may seem like everywhere your child turns there is a touch-screen calling to them, there is still nothing that opens up the world of imagination and possibility like a good book. By reading both quietly and out loud, Book Club students will greatly improve their ability to determine meaning from the written word along with public speaking skills and listening skills. Watch your child discover more about their world through a book - great readers often become great thinkers!

### **BASKETBALL**

The children are taken through various exercises, drills, and games to improve their basketball skills. The children will learn about the history of the game of basketball, key players, and different key mental aspects of the game that players must possess in order to be successful on and off the court. This training is good for players of all levels.

## OUR APPROACH

The Apollo After School program develops skills and interests that will help children succeed both in and out of school.

Our clubs create a fun and healthy learning environment for our students through a mix of physical, intellectual, and social activities.
